

ivanto App

The accessible mobility-assistant

The app offers intermodal door-to-door routing that works smoothly between public transport, taxi services, bike sharing, car sharing and personal navigation by car, bike and foot.

When in assistance-mode, the app gives the user context-sensitive information and individual support during travel. The app is multilingual and available for iOS and Android devices.

Smart-Routing

Intermodal routing – combination of personal, shared and public transportation with pricing and real-time information.

Sharing Economy

Availability-check and booking within the app of sharing-economy vehicles like bikes, cars and scooters.

Interactive Map

Display of public transport stops, stations, routes and vehicle location in real-time, as well as bicycle stations, sharing-economy vehicles and other POIs.

Ticketing and BigData

Capturing of usage and login data (Be-In/Be-Out) for ticketing, payment and planning purposes.

Departure Monitor

The virtual departure monitor shows real-time information about departure times and delays.

Push-Notifications

Automatic notifications of service changes and disruptions.

Dynamic Favorites

Continuous route-information to favored destinations based on location.

Travel Assistance

Virtual travel assistant with next-stop announcement and notifications for transferring and exiting vehicles.

Navigation for Pedestrians and Cyclists

Maps, voice notifications, as well as vibration and sound hints for guidance that lead the user safely to destination.

★★★★★
Thank you! Attended customer requests.

★★★★★
Good, tidy app for public transport!
I use the app especially for route searching. I like the tidy design very much. Nice!

★★★★★
Very well made app.
Clear, fast, good.

★★★★★
5 stars!
Super fast und user-friendly!
